

ROLLING DOUGH

USE CASE

Overview

Rolling Dough uses multiple systems to manage their time and attendance, payroll and recordkeeping while implementing Paycor for their human resources management system. Rolling Dough time and attendance system lacks integration into Paycor, which would streamline the payroll process and without the need for spreadsheets. TAP Innovations bridged the gap so employee punches and tips from the Rolling Dough time and attendance system automatically feed into Paycor. TAP is a preferred Paycor integration partner and was able to quickly and cost-effectively save 8 weeks in implementation time.

Problem

Rolling Dough chose Paycor as their human resources management system which lacked integration and process automation into their time and attendance system. This caused several challenges in employee data management and timely payout.

1. Lack of visibility into time and data keeping across multiple locations
2. Error-prone tasks of managing employee time and tip data manually through spreadsheets
3. Delay and added cost and resources due to manual efforts of extracting and loading data

TAP Solution

TAP Innovations automates the data connectivity process between systems to make time and attendance tracking more effective, efficient, and timely for payroll. TAP built an integration program with the point of sale (POS) system that does the following:

1. Retrieve punch data and tips files daily
2. Develop data transformation criteria, such as lookup tables
3. Create integration program to feed into the time and attendance system
4. Automatic process error notifications
5. Results tracking

Process automation and system connectivity streamlines time management and is scalable across multiple locations and business systems.

TAP Integration Solutions:

-  Remove reliance on spreadsheets
-  Organize recordkeeping, insight into global financials
-  Improve employee satisfaction
-  Provide global analytics and reporting capabilities
-  Are available through any web and mobile device
-  Saved Rolling Dough 8 weeks in implementation time

Time and Data Automation Solution is scalable and supports added locations, systems, geographic locations and teams. This solution eliminates the challenges associated with employee relations, information systems, compliance and financials.

TAP has connected thousands of users to accurate, actionable information in real-time. TAP success spans the HR industry and beyond with cloud-based solutions:

- Bi-directional integrations transform data
- Data transformations
- Data capture
- Bulk data loads to transfer historical data
- Actionable Information

TAP provides a scalable solution to support time tracking and recordkeeping across additional restaurant locations, and reporting capabilities so users can accelerate or pivot business plans.
