

TAP Innovations is proud to announce that we now build and deploy integrations that move employee, time, and tip data exactly where it needs to go and fast.

We're helping Toast sellers remove integration roadblocks, accelerate deals, and deliver complete automation for restaurant, retail, and hospitality customers.

These success stories show how TAP turns integration challenges into competitive advantages, helping Toast sellers close more deals, boost satisfaction, and strengthen platform loyalty for life.

Tumble 22

From Spreadsheets and Tip Haus to a Single Source of Truth

Tumble 22, a fast-growing hot chicken brand with 7 locations, was feeling the heat when payroll pain came bubbling up. The team was stuck juggling Tip Haus, spreadsheets, and manual math for guaranteed wages and tip pools.

TAP Innovations stepped in with the integration expertise needed to simplify operations and eliminate manual work.

TAP developed and deployed an integration that automates time, tips, and earnings data, complete with Tumble 22's custom guaranteed pay logic.

Now Tumble 22 is frying up more success than ever before, with smoother payroll, cleaner data, and more time to focus on growth.

EVO Entertainment

Turning 20 FEINs of Payroll Chaos into Clean, Connected Data

When EVO Entertainment, a Texas-based cinema and restaurant group with more than 12 locations, faced payroll complexity that was becoming a showstopper, they needed help fast. With 20 FEINs, layered pay rules, and countless manual entries, keeping systems aligned was nearly impossible.

TAP Innovations developed and deployed automated integrations that kept Toast and their payroll systems in sync, moving employee, time, and tip data cleanly between platforms. The result was scalable automation that eliminated errors, improved accuracy, and saved hours every week.

Now EVO is serving up five-star employee and customer experiences while Toast's platform is stickier than ever.

The New Toast Chapter

Smarter & Faster Integrations

After years of unlocking Toast's potential, TAP's work is now fueling a new chapter.

Gastronauts and Fado are just two examples of how we're helping restaurants run smarter, faster, and cleaner through Toast Integrations.

Gastronauts

Turning Fire-Drill Payroll into a Streamlined Flow

When Gastronauts, an 11-location restaurant group known for elevated comfort food and high-volume service, needed to simplify manual payroll work, they found a partner in TAP Innovations.

TAP is solving the **M.E.S.S.** (Manual Efforts & Spreadsheets) by developing and deploying automation that moves employee, time, and tip data in one clean stream through Toast and the team's payroll solution. Payroll now runs like clockwork, freeing managers to focus on guests instead of grids.

Gastronauts is serving up efficiency with every shift.

Fado Irish Pub

From Payroll Panic to Real-Time Precision

Fado Irish Pub, a national chain known for lively bars and complex tip structures, faced constant payroll challenges. Every week, staff data, hours, and tips had to be chased down manually, making payday unpredictable.

TAP Innovations delivered a real-time integration between Toast and payroll systems that unites employee, time, and tip data. Payroll now lands on time, every time, without the scramble, giving Fado's team more time to focus on their guests and growth.

Fado traded spreadsheets for pints, and it's been smooth pouring ever since.

The Road Ahead

Expanding Toast Integrations & Driving New Wins

The Now & What's Ahead

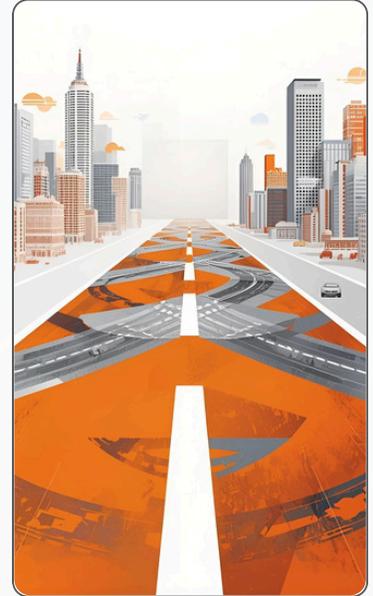

TAP + Toast: The Momentum Continues

As of Fall 2025, TAP's Integration pipeline with Toast is stronger than ever. More than **25 active Toast Integration Projects** are underway, across restaurants, breweries, and hospitality groups nationwide.

From **CoCo Playa** to **My Burger**, **Braxton Brewing**, and **Frank Pepe's**, these projects represent how TAP helps Toast sellers turn Integration challenges into closed deals and turning manual data headaches into smooth automation.

Each new deal proves that when Toast sellers bring TAP into the conversation, they close faster, keep clients longer, and build stronger connections within the Toast platform.

Once those integrations go live, TAP's World-Class Support team is there 24/7 to keep everything running smoothly.

Your Next Big Advantage..

FlowIQ - A Platform Built To Win

TAP is taking six years of Integration experience and turning it into something smarter, faster, and more affordable.

FlowIQ is our Next Generation *Integration Platform as a Service* (IPaaS) that simplifies data movement across systems.

It delivers automation that improves speed, accuracy, and scalability while strengthening platform stickiness and long-term performance.

Supported by TAP's World-Class Support team available 24/7, FlowIQ is built for growth and for sellers who want to stay one step ahead.

It is the foundation for the next era of HCM connectivity.

TAP's NEW Historical Document & Data Migration

TAP has always helped restaurants move historical documents and data into new systems, but now the process is faster, smarter, and more affordable.

What's New:

- **30%+** lower cost than previous pricing models
- **Two delivery options:** direct to system or to file storage systems like OneDrive or SharePoint
- Smoother transitions and shorter sales cycles that keep clients connected to Toast
