

ALTERNATIVE HOME CARE SPECIALISTS

VIVENTIUM INTEGRATION USE CASE

Overview

Alternative Home Care Specialists provides personal care support to Louisiana residents. Employees submit their time and hours worked into the Louisiana Services Reporting System (LaSRS), which is then needed to process payroll through their Viventium HR software. Retrieving employee time and daily hours reporting from LaSRS is manual and time-consuming, and lacks the automation capabilities for more efficient payroll processes. **Alternative Home Care Specialists chose TAP Innovations to automate manual time transfers quickly and affordably with premier integration solutions!**

Business Challenge/Problem

Alternative Home Care Specialists launched Viventium HR software which requires field customization to properly map LaSRS employee clock in and out data. Each employee's total worked hours data from LaSRS needs to be pulled daily and current processes are manual with multiple steps to retrieve and format correctly. To transfer payroll data timely and accurately from LaSRS to Viventium Time Clock templates, integration, automation and customization was required to eliminate the need for manual efforts and spreadsheets in their payroll processes.

Key Digital Tools

TAP Innovations is an HR system integration expert and closed their employee time transfer gaps with customized and automated data processes that bring efficiencies and increased usability to their Viventium HR platform.

1. Automatic daily pull of employee time and hours worked data
2. Data formatting
3. Custom field configuration to align worker data across LaSRS and Viventium
4. Automatic error notifications for missing or incomplete data
5. LaSRS integration
6. Server hosting
7. Ongoing file maintenance
8. Back-end technical and customer service support

TAP Innovations' Solutions

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

-  Bi-directional integrations
-  Bulk data loads to transfer historical data
-  Data transformations
