Overview

With over 200 international, national, regional and local affiliates and a network of more than 4,000 audio and video technicians and certified installers, CoLiant Solutions enlisted TAP Innovations to develop a mobile application to improve HR business functions. **TAP Innovations is a custom application development expert and will streamline time tracking, billing, and invoicing processes quickly and affordably.**

Business Challenge/Problem

CoLiant Solutions is limited on secure and accurate invoicing business functions for on-the-go technicians. Business systems operate separately and do not share time and job information which causes manual efforts to calculate charges and submit customer invoices. CoLiant Solutions turned to TAP Innovations to develop a mobile application that integrates with their current Sage Human Resource Management System (HRMS).

Digital Tools

TAP Innovations provides custom application and development to increase business efficiencies for CoLiant Solutions.

- User interface and user experience (UI/UX) enhancements

- Sage integration to automatically acquire job data and feed time-tracking data back

- Mobile development for increased security and useability

- Billing and invoicing module improves accounts receivable processes

- Time tracking authoring process notifications for time entry reviews (approve/reject) and better management of assigned jobs in the field

- On demand data extracts that can be mapped to the data structure and integrate with Paycor or any other HCM software

- Ongoing customer and technical service

TAP Innovations Solutions

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries, including franchises:

- Bi-directional integrations
- Data transformations
