

COMMUNITY SERVICE PROVIDER

HR SOFTWARE VENDOR INTEGRATION USE CASE

Overview

Louisiana Service Reporting Systems (LaSRS) is a core business system used for employee information management for a community service provider in Louisiana. Manual efforts and data processing errors drove this organization to seek a vendor partner for payroll efficiency gains. Payroll process automation through system integration, data transfer and other efficiency tools will significantly improve workflows.

TAP Innovations is a premier system integrator and solved their time and attendance integration challenges quickly and affordably!

Business Challenge/Problem

LaSRS is a core business system used for employee time punches and recordkeeping. Transferring this information to HR software is required for payroll readiness and processing. To transfer payroll data timely and accurately from LaSRS to their HR software vendor, integration, automation and data deduplication was required to eliminate the need for manual efforts and spreadsheets. Current data formatting limitations include:

- Employee ID field inconsistencies
- Manual mapping employee IDs to HR software worker codes
- Growing list of processing errors
- Duplicate records and time punches

This organization chose TAP Innovations to develop a custom environment and integration solution with affordable and easy to implement solutions to automate data transfer requirements.

TAP Innovations Solution

TAP Innovations is an integration expert and closed their data transfer gaps with digital tools and new customized and automated data processes.

- SFTP environment setup
- Automatic data pull
- Data deduplication
- Data transfer to HR software
- Hosting
- Ongoing file maintenance
- Back-end support
