

# DJS LANDSCAPE

## PAYCOR INTEGRATION USE CASE

### Overview

DJ's Landscape is the largest landscape management company in West Michigan. Employee data is stored and managed in multiple systems, including Aspire business management software for landscaper operations and Paycor for HR needs. Manual efforts to replicate changes in both data environments are required, causing duplicate work and inefficiencies in downstream processes including record management, demographic updates, payroll and more. **TAP Innovations is a premier system integrator and in a matter of weeks solved their big system connectivity gap quickly and affordably with enterprise integration and global access to employee data!**

### Business Challenge/Problem

DJ's Landscape relies on Aspire for their business operation needs and storing employee records. Syncing this information with their new Paycor HR system requires data transfers and manual record updates in both systems. System integration between Aspire and Paycor would eliminate the need for manual interventions and spreadsheets which cause errors, duplicate information and redundant processes. Centralized access to employee data and changes enables an enterprise approach to information management, which would improve business operations and streamline payroll processing workflows.

### Key Digital Tools

TAP Innovations is a Paycor integration expert and in a matter of weeks, closed their system integration gap with digital tools and new customized and automated data processes.

- SFTP Environment setup
- Data extractions
- Format data based on unique fields
- Upload data into Aspire
- Paycor integration
- Customized process run times
- Ongoing customer and technical service
