

SQL 2000 DATABASE CONVERSION

USE CASE

Overview

An independent oil and natural gas exploration and production company headquartered in Dallas, TX needed a solution to manage their estimated 260 gigabytes of data. Their business information was accumulated over the past 20 years as they convert their SQL 2000 database to a new host. Transitioning databases is a complex process. TAP Innovations will restore and align this customer's data and to meet the new template requirements and ensure a smooth transition of data and business operations.

Business Challenge/Problem

An immediate business objective was to prepare their business to implement a new software for their oil and gas business operations. With a large amount of data in their SQL 2000 database, running a query on this existing system could cause technical challenges without the proper diligence to backup or restore their critical business information. This customer sought a technology partner who could provide an enterprise approach to backup and restore their historical business data, and populate this information so it flows into their new software seamlessly within their predetermined templates.

Key Digital Tools

TAP Innovations is a technology system expert, offering affordable data management services to increase the usability and efficiency of new business systems with proper formatting and conversion of historical data. TAP Innovations launched a multi-phase approach to meet their database conversion needs.

1. Secure environment setup
2. Restore and backup SQL 2000 database
3. Populate new business system templates with backup SQL data
4. Ongoing technical and customer service

TAP Innovations' Solutions

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

-  Bi-directional integrations
-  Bulk data loads to transfer historical data
-  Data transformations
-  Actionable Information
-  Data capture
-  Easily scalable and repeatable across franchises
