

# HONEYGROW, LLC

## PAYCOR INTEGRATION USE CASE

### Overview

Honeygrow restaurants can be found throughout Philadelphia, PA with 25 locations that accommodate dine-in, delivery and catering food orders. Streamlining employee punch data across multiple fast-casual restaurants and business systems was a starting point for Honeygrow to seek an integration partner. **TAP Innovations is a premier system integrator and solved their big system connectivity gap with affordable integration, enterprise access to data and scalable solutions!**

### Business Challenge/Problem

Employee punch, demographic and other time data across multiple eatery locations is managed in Toast, a restaurant point of sale (POS) platform. While Toast and their human resources management system, Paycor, bring significant efficiencies to Honeygrow restaurant operations, manual processes required multiple data entry points for new hire records and employment status changes.

- Toast POS and Paycor data fields were not aligned to convert timesheet data into proper format
- Manual employment status change entry between business systems
- Frequent record processing errors and duplicated work
- Lack of process automation and system integration to manage employee records and timesheets

### TAP Innovations' Solution

**TAP Innovations is a Paycor integration expert and in a matter of weeks, closed their integration gap with digital tools and automated data processes for accurate employee records across their business systems.**

- SFTP Environment setup
- Demographic data extractions
- Data transformation
- Paycor integration
- Output file standardization
- Automatic error processing notifications
- Customized automated run time
- Ongoing customer and technical service

## Key Digital Tools

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

-  Bi-directional integrations
