

MGA HOMECARE

PAYCOR INTEGRATION USE CASE

Overview

MGA Homecare provides private duty nursing, homecare and therapy services across the U.S. including in Arizona, Colorado, North Carolina and Texas. Manual efforts and spreadsheets made it difficult to access an enterprise view of their payroll reports. MGA Homecare chose TAP Innovations to streamline their payroll workflows with data transfer automation. **TAP Innovations is a premier system integrator and in a matter of weeks designed a customized reporting solution with consolidated employee data across MGA location entities.**

Business Challenge/Problem

Generating consolidated reports post-payroll is a manual and time-consuming process for MGA. An enterprise view of employee information and earning scores segmented across locations is a critical workflow, and extracting this data from Paycor lacks process automation. Currently, MGA manages 30 reports generated from each business entity and pay period, and the process to consolidate payroll reports is not sustainable without integration and automation tools. Implementing a solution that is scalable to onboard new entity locations quickly and affordably will improve business efficiencies.

TAP Innovations' Solution

TAP Innovations is a Paycor integration expert and closed their reporting gap with affordable digital tools and automated data processes across their business entities.

- SFTP environment setup
- Paycor payroll data retrieval
- Employee data transfer and customization
- Consolidated report generation for the payroll period
- Customized automated run time
- Automatic successful and error processing notifications
- Ongoing customer and technical service

Key Digital Tools

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

Bi-directional integrations

Bulk data loads to transfer historical data

Data transformations

Actionable information

Data capture
