

PANINI KABOB GRILL

PAYCOR INTEGRATION USE CASE FOR HISTORICAL DOCUMENTS

Overview

Panini Kabob Grill (PKG) operates a scratch kitchen to prepare and offer high-quality Mediterranean foods across 18 California locations. PKG employee profiles are being migrated from one HR system to Paycor, and an estimated 18,000 documents will need to be loaded into their new Paycor Perform Payroll/HR platform. Robotic Process Automation (RPA) technology quickly and affordably automates data transfer efforts and eliminates manual work associated with those tasks. **TAP Innovations is a premier system integrator and in 4 weeks solved their data migration gap with enterprise integration and access to employee data!**

Business Challenge/Problem

Panini Kabob Grill (PKG) is transitioning to Paycor to manage employee time, payroll and other HR needs. Migrating data between a legacy Human Capital Management (HCM) application to another can be cumbersome, and for PKG, an estimated 18,000 employee profile records needed to be transferred. PKG sought a solution that could automatically export their employee profile records from one platform and accurately load into employee profiles stored in Paycor. Robotic Process Automation (RPA) technology through TAP Innovations helps customers manage large amounts of documents quickly, and in this case, was the best solution to manage document transfers for PKG's.

Key Digital Tools

TAP Innovations is a Paycor integration expert and in a matter of weeks, closed their system integration gap with digital tools and new customized and automated data processes.

1. Robotic Process Automation (RPA) technology
2. Employee document extraction
3. Employee profile matching
4. Document load into Paycor
5. Ongoing customer and technical service

TAP Innovations' Solutions

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

- Bi-directional integrations
- Data transformations
- Data capture
- Bulk data loads to transfer historical data
- Actionable Information
- Easily scalable and repeatable across franchises
