QUALITY LONG TERM CARE
VIVENTIUM INTEGRATION USE CASE

Overview

Quality Long Term Care provides home care services to residents in cities and neighborhoods throughout Louisiana. Employees submit their time and hours worked into the Louisiana Services Reporting System (LaSRS), which is then needed to process payroll through their Viventium HR software. Retrieving employee time and hours reporting from LaSRS is manual and time-consuming, and lacks the automation capabilities for more efficient payroll processes. **Quality Long Term Care chose TAP Innovations to develop an integration solution with affordable and easy to implement solutions to automate data transfer!**

Business Challenge/Problem

Quality Long Term Care implemented Viventium HR software for payroll processing needs. Employee time data from LaSRS, including each employee's clock-in and clock-out times, require multiple steps to retrieve and format correctly. To transfer payroll data timely and accurately from LaSRS to Viventium, integration, automation and data formatting was required to eliminate the need for manual efforts and spreadsheets in their payroll processes.

Key Digital Tools

TAP Innovations is an HR system integration expert and closed their employee time transfer gaps with customized and automated data processes that bring efficiencies and increased usability to their Viventium HR platform.

1. Automatic daily pull of employee time and hours worked data
2. Data formatting
3. Custom field configuration to align worker data across LaSRS and Viventium
4. Automatic error notifications for missing or incomplete data
5. LaSRS integration
6. Server hosting
7. Ongoing file maintenance
8. Back-end technical and customer service support

TAP Innovations' Solutions

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

- Bi-directional integrations
- Data transformations
- Data capture
- Bulk data loads to transfer historical data
- Actionable Information
- Easily scalable and repeatable across franchises
