

STARC OF LA

PAYCOR INTEGRATION USE CASE

Overview

STARC provides lifetime services to individuals in five Louisiana parishes who need support for job training, advocacy, resources and communication connections. Multiple systems, including Louisiana Service Reporting Systems (LaSRS) and Paycor are used to manage employee information and process payroll. Manual efforts and data processing errors drove STARC to seek a vendor partner for payroll efficiency gains. Payroll process automation through system integration, data transfer and other efficiency tools will significantly improve workflows. **TAP Innovations is a premier system integrator and solved their time and attendance integration challenges quickly and affordably!**

Business Challenge/Problem

STARC uses LaSRS for employee time punches and recordkeeping. Transferring this information to Paycor is required for payroll readiness and processing. To transfer payroll data timely and accurately from LaSRS to Paycor, integration, automation and data deduplication was required to eliminate the need for manual efforts and spreadsheets. Current data formatting limitations include:

- Employee ID field inconsistencies
- Manual mapping employee IDs to Paycor worker codes
- Growing list of processing errors
- Duplicate records and time punches

STARC chose TAP Innovations to develop a custom environment and integration solution with affordable and easy to implement solutions to automate data transfer requirements.

Key Digital Tools

TAP Innovations is a Paycor integration expert and closed their data transfer gaps with digital tools and new customized and automated data processes.

- SFTP environment setup
- Automatic data pull
- Data deduplication
- Data transfer to Paycor
- Hosting
- Ongoing file maintenance
- Back-end support

TAP Innovations' Solution

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

-  Bi-directional integrations
-  Bulk data loads to transfer historical data
-  Data transformations
-  Actionable Information
-  Data capture
-  Easily scalable and repeatable across franchises
