Overview

United Building Maintenance has provided affordable, high quality facilities maintenance for more than 30 years. United Building Maintenance manages employee records in separate systems, Paycom and Paycor. Separate applications require multiple processes to upload documents between systems. With over 900 employees, tasks and information management quickly became unmanageable for HR teams. TAP Innovations implemented sophisticated Robotic Process Automation (RPA) technology to automate document retrieval and uploading of 12,500 documents between the two core business systems.

Business Challenge/Problem

Managing multiple business technology systems became a challenge when documents needed to be transferred from one system to the other. Manual efforts to upload individual documents were too extensive and error-prone. Employee data fields within their profiles were not aligned between Paycom and Paycor. Lacking the ability to automate document uploads, United Building Maintenance turned to TAP Innovations, an expert in Paycor system integration and process automation.

TAP Innovations' Solution

TAP Innovations is a Paycor integration expert and in a matter of weeks, launched sophisticated Robotic Process Automation (RPA) technology and new automated document management processes.

Using Robotic Process Automation (RPA) technology, TAP Innovations will automatically upload documents from Paycom to employee profiles in the Paycor platform. Through RPA, TAP can upload thousands of documents quickly and accurately to eliminate the need for manual reviews and verifications. Process automation will bring significant time and cost savings to United Building Maintenance teams, along with efficiencies to core workflows.

Key Digital Tools

TAP Innovations is a premier systems integrator and customer implementations expert for HR, CRM, Financial, LMS, POS, and Healthcare (EMR and PM) software companies. Solutions are easily scalable and repeatable across multiple industries including franchises:

- Bi-directional integrations
- Data transformations
- Data capture
- Bulk data loads to transfer historical data
- Actionable information
- Easily scalable and repeatable across franchises
