

URBAN AIR ADVENTURE PARK

PAYCOR INTEGRATION USE CASE

Overview

Urban Air Adventure Parks operate nearly 200 trampoline park locations across the United States. Big systems often lack integration capabilities, and connectivity between a newly implemented Paycor HR system and a current learning management system to manage new hire data needs to be bridged. **TAP Innovations is a premier system integrator and is able to onboard 150 Urban Air Adventure Park locations in 90 days to solve their data transfer challenges affordably and efficiently.**

Business Challenge/Problem

Managing employee data for nearly 200 trampoline parks can be manual and time-consuming without the proper tools and integration between main business systems, Paycor and an online learning management system, Wisetail. Tasks for employee data management were difficult to complete due to lack of system access for new hire employees. Data transfer between the systems became a sticking point in the Paycor implementation, causing potential delays and higher expenses.

System integration, data transfer and other digital tools and solutions will increase speed to market for the overall Paycor implementation for Urban Air Adventure Parks while solving data access gaps and manual processes.
